

Product profile

VITR-W800 way signal acquisition linkage equipment that supports passive input. The input and output status of each channel has LED status light, built-in dual watchdog function to ensure reliability, self-inspection function and LED status display for on-site debugging and troubleshooting.

Model	Name	Specifications
VITR-W800	Eight-way signal acquisition linkage equipment	AC220V or DC12V power supply
		Communication Interface, RJ45
		Eight road signal collection, eight road often open and often closed dry contact output

- Maximum power: 3W
- Dimensions: 190 * 105 * 33 (mm)
- communication mode: Ethernet communication
- communication protocol: TCP / IP communication protocol
- communication rate: Supports the 10M / 100M communication rate
- operating temperature: -40°C - - + 80°C
- working humidity: 95%
